

## Husqvarna Chainsaw Sharpener

[Husqvarna](#) is a Swedish company and is a producer of various outdoor power products. One of its best-selling products is a chainsaw, and these can be used for a longer time due to large fuel tanks and low fuel consumption. The chainsaws by Husqvarna are at a competitive price and have a longer warranty. The performance, power, and design of Husqvarna chainsaws enable the user to meet all his needs.

When the chainsaws are used for some time, it is observed that their blades get dull. This is the time when it needs a service for sharpening its blades. Instead of taking it to the service center, you can do it at home only with the help of a chainsaw sharpener. Husqvarna chainsaw sharpeners are well-known in the market and sharpen the chainsaw chain easily, which ensures you get a clean cut every time you use a chainsaw.

## **What is required to file the chain?**

Certain chainsaw sharpening tools are required to keep the chain sharp, and these are round file, flat file, stump vice, and file gauge.

It should be noted that there should be different round files and gauges for different types of chains.

## **Filing angles**

Depending on these angles, the cutters should be filed-

- Side plate cutting angle
- Top plate cutting angle
- Depth gauge setting
- File down angle
