

WHAT ARE CATARACTS?

A Cataract is a clouding of our natural lens of the eye. Most cataracts are related to aging and are far more common in older people.

SYMPTOMS OF CATARACTS

Cataracts typically develop slowly and painlessly over time – in fact, in the early stages, symptoms may be so mild that you may not even realize your vision is changing.

CATARACT TREATMENT IN JACKSONVILLE

Our surgeons have performed more than 75,000 cataract procedures and have a combined 50 years of practice at the Mayo Clinic, University of Florida and more. Florida Eye Specialists offers the very best in experience, safety, and accuracy for our patients.

CATARACT CONSULTANTS
